1. PURPOSE

1.1. To promote, guide and direct professional nursing practice by setting the desired and achievable level of performance against which actual performance can be compared.

1.2. To provide a method to assure clients that they are receiving high-quality care, that the nurses know exactly what is necessary to provide nursing care and that measure are in place to determine whether the care meets the standards.

1.3. To provide a guide to the knowledge, skills, judgment and attitudes that are needed to practice safely.

2. DEFINITION & ABBREVIATION

2.1. **Standards may be defined as:**

2.1.1. Professionally developed expressions of the range of acceptable variations from a norm or criterion. (Avedis Donabedian)

2.1.2. Benchmark of achievement which is based on a desired level of excellence.

2.2. **Criteria** are pre-determined elements against which aspects of the quality of medical service may be compared.

2.3. **Standards of Practice** – Describe a competent level of nursing practice demonstrated by the critical thinking model known as the nursing process. These standards encompass significant actions taken by registered nurses and form the foundation of the nurse's decision making and action.

2.4. **Standards of Professional Nursing Practice** – Authoritative statements of the actions and behaviors all registered nurses, regardless of role, population, specialty, and setting are expected to competently perform.

2.5. **Professional Nursing Practice** involve specialized skills essential to the performance of a unique, professional role (which is nursing), and it requires two main concepts that are in the forefront of professional nursing - which are accountability and autonomy.

2.5.1. ***Accountability*** is the state of being responsible and answerable for one's own behaviour. The sphere of a nurse's accountability is to self, the client, the employing agency, and the profession. (ANA Standards of Nursing Practice)

2.5.2. ***Autonomy*** in nursing is the freedom and the authority to act independently. It implies control over one's practice, and it applies to both decisions and actions

2.6. **Nursing Standards of Care** pertains to professional nursing activities that are demonstrated by the nurse through the nursing process (assessment, planning, intervention, evaluation)

2.7. **Standards of Professional Performance**

2.7.1. Describe a competent level of behavior in the professional role, including activities related to quality of care, performance appraisal, education, collegiality, ethics, collaboration, research, and resource utilization.

3. RESPONSIBILITY

3.1. **Nursing Director** - establishes, oversees, and approves nursing policies and procedures and nursing professional standards of practice and patient care.

3.2. **Nursing leaders** - composed of the Nursing Supervisors and department coordinators assists in implementation and monitoring of staff compliance to the standards.

4. POLICY

4.1. The Nursing Department of PMSH shall be guided by the following standards of professional practice adopted from the American Nurses' Association Standards of professional performance.

4.2. The Standards of Professional Practice serves as objective guidelines for nurses to be accountable for their actions, their patients, and their peers, and shall form part of the bases for performance evaluation.

4.3. Successful application of the Standards will be measured based on specific nursing process and outcome indicators.

5. PROCEDURE

5.1. The Nursing Director approves the following Standards of Professional Nursing Practice and Patient Care for implementation in the Nursing Department:

5.1.1. **Standards of Professional Performance**

Standards	Definition	Measurement Criteria
1. QUALITY OF PRACTICE	The registered nurse systematically enhances the quality and effectiveness of nursing practice	1. Demonstrates quality by documenting the application of the nursing process in a responsible, accountable and ethical manner. 2. Uses quality improvement activities to initiate changes in nursing practice and health care delivery system 3. Uses creativity and innovation to improve nursing care delivery 4. Incorporates new knowledge to initiate changes in nursing practice if desired outcomes 5. Demonstrates quality by documenting the application of the nursing process in a responsible, accountable and ethical manner. 6. Uses quality improvement activities

		to initiate changes in nursing practice and health care delivery system 7. Uses creativity and innovation to improve nursing care delivery.
2. EDUCATION	The nurse attains knowledge and competency that reflects current nursing practice	1. Participates in ongoing educational activities related to clinical knowledge and professional issues. 2. Demonstrates commitment to lifelong learning. 3. Seeks experiences to maintain clinical skills 4. Seeks knowledge and skills appropriate to the practice setting 5. Maintains professional records that provide evidence of competency and lifelong learning.
3. PROFESSIONAL PRACTICE EVALUATION	The nurse evaluates one's own nursing practice in relation to professional practice standards and guideline, relevant statutes, rules and regulations.	1. Engage in self-evaluation on a regular basis 2. Seeks constructive feedback regarding one's own practice 3. Takes action to achieve goals identified during the evaluation process 4. Participates in systematic peer review as appropriate 5. Practice reflects knowledge of current practice standards, laws and regulations 6. Provides age appropriate care in culturally and ethnically sensitive manner
4. COLLEGIALITY	The nurse interacts with and contribute to the professional development of peers and other health care	1. Shares knowledge and skills with peers and colleagues 2. Provides peers with feedback regarding their practice 3. Interacts with peers and

	providers as colleagues	colleagues 4. To enhance one's own professional nursing practice 5. Maintains compassionate and caring relationships with peers and colleagues 6. Contributes to an environment that is conductive to clinical education nursing students as appropriate 7. Contributes to a supportive and healthy work environment
5. COLLABORATION	The nurse collaborates with patient, family, and others in the conduct of nursing practice	1. Communicates with the patient, significant others, and health care providers regarding patient care and nursing's role in the provision of care 2. Collaborates with patient, family and others health care providers in the formulation of overall goals and the plan of care and in the decisions related to care and delivery of services 3. Partners with others to effect change and generate positive outcomes 4. Document referrals, including provisions for continuity of care, as needed
6. ETHICS	The nurse integrates ethical provisions in all areas of practice	1. Maintains therapeutic and professional patient-nurse relationship 2. Delivers care in the manner of that preserves patient autonomy, dignity, and rights. 3. Seeks available resources in formulating ethical decisions 4. Reports illegal, incompetent or impaired practice

		5. Maintain patient confidentiality within legal and regulatory parameters. 6. Develops processes for monitoring activities including screening for potential or actual
7. RESEARCH	The nurse integrates research findings in practice.	1. Utilize best available evidence including research findings to guide practice decisions 2. Participating in data collection 3. Participating in a unit, organization, or community research committee 4. Uses research findings in the development of policies, procedures, and practice guidelines for patient care 5. Incorporates research as a basis for learning
8. RESOURCE UTILIZATION	The nurse considers factors related to safety effectiveness, cost, and impact on practice in the planning and delivery of nursing services.	1. Evaluates factors related to safety, effectiveness, availability and cost when practice options would result in the same expected patient outcome 2. Assists the patient and family in identifying and securing appropriate and available services to address health related needs 3. Assigns or delegate tasks based on the needs and condition of the patient, the potential for harm, the stability of the patient's condition, the complexity of the task, and the predictability of the outcome
9. LEADERSHIP	The nurse provides leadership in the professional practice setting and the profession.	1. Engage on team work. 2. Works to create and maintain healthy work environment. 3. Teach others to succeed through mentoring. 4. Exhibits creativity and flexibility

		during change. 5. Directs coordination of care across settings and care givers. 6. Serves in key roles in the work settings by participating on committees, councils, and administrative. 7. Promotes advancement of the profession. 8. Display the ability to define a clear vision, the associated goals, and a plan to implement and measure progress. 9. Demonstrates energy, excitement and a passion for quality work. 10. Willingly accepts mistakes by self and others, thereby creating a culture in which risk-taking is not only safe, but expected.

5.1.2. **Standards of Care**

Standard	Measurement Criteria
1. ASSESSMENT 1.1. The nurse collects comprehensive data pertinent to the patients' health or situation	1. Collects patient data in a systematic and ongoing process. 2. Data collection involves the patient, significant others, and health care providers, when appropriate 3. Prioritizes data collection activities based on the patient's immediate condition or needs determine the priority of data collection 4. Collects pertinent data using appropriate assessment techniques 5. Document relevant data in a retrievable form

2. DIAGNOSIS 2.1. The nurse analyses the assessment data to determine the diagnoses or issues	1. Derives diagnoses from the assessment data 2. Validates the diagnoses with patient, significant others, and health care providers, when possible. 3. Documents diagnoses in a manner that facilitates the determination of expected outcomes and plan of care

3. OUTCOME IDENTIFICATION 3.1. The nurse identifies expected outcomes for a plan individualized to the patient or the situation	1. Derives outcomes from the diagnoses 2. Formulates outcomes mutually with the patient and the health care providers, when possible. 3. Outcomes are culturally appropriate and realistic in relation to the patients present and potential capabilities 4. Defines expected outcomes in terms of the patient, patient values, ethical considerations, environment, or situation with such consideration as associated risks, benefits, costs, current scientific evidence, and clinical expertise when formulating expecting outcomes. 5. Outcomes are attainable in relation to resources available to the person 6. Outcomes include a time estimate for attainment for expected outcome. 7. Outcomes provide direction for continuity of care 8. Modifies expected outcomes based on changes in the status of the patient or evaluation of the situation. 9. Documents outcomes as measurable goals.
4. PLANNING 4.1. The nurse develops a plan that prescribes strategies and alternatives to attain expected out comes	1. The plan is individualized to the patient and patient's condition or needs 2. Develops the plan with the patient, significant others, and health care providers, when appropriate. 3. Includes strategies within the plan that address each of the identified diagnosis or issues, which

	may include strategies for promotion and restoration of health and prevention of illness, injury, and disease. 4. Provides for continuity within the plan. 5. Utilizes the plan to provide direction to other members of the health care team. 6. Defines the plan to reflect current status, rules, and regulations and standards. 10. Uses standardized language or recognized terminology to document the plan.
5. IMPLEMENTATION 5.1. The nurse implements the identified plan of care 5.2. Co-ordination of care. The registered nurse coordinates care delivery. 5.3. Health teaching and health promotion	1. Interventions are consistent with the established plan of care 2. Implements interventions in a safe and appropriate manner, documents interventions 3. Utilizes evidence –based interventions and treatments specific to the diagnosis or problem. 4. Collaborates with nurse colleagues to implement the plan 5. Coordinates implementation of the plan. 6. Documentation of the care 7. Uses health promotion and health teaching methods appropriate to the situation and the patient's developmental level, learning needs, readiness, ability to learn, language preference, and culture. 8. Seeks opportunities for feedback and evaluation of the effectiveness of the strategies used.
6. EVALUATION 6.1. The nurse evaluates progress towards attainment of outcomes	1. Evaluates therapeutic and potential adverse effects and potential adverse effects of pharmacological and non-pharmacological treatment. 2. Provides patients with information about intended effects and potential adverse effects of proposed prescriptive therapies. 3. Involves the patient, significant others, and the health care providers in the evaluation process, when appropriate 4. Uses ongoing assessment data to revise

	diagnoses, outcomes and plan of care as needed 5. Documents revisions in diagnoses, outcomes, and the plan of care 6. Evaluates the effectiveness of interventions in relation to outcomes. 1. Documents the patients' response to interventions.

5.2. Periodic evaluation by the nurse leaders whether actual nursing care meets criteria in the standards based on specific clinical nursing indicators.

6. MEASUREMENT

6.1. 100% nursing staff awareness and compliance with the policy and procedures.
