14. REVIEW SUMMARY

1. **Purpose**
    a. To prevent transmission of infectious diseases between personnel and patient.
    b. To prevent risk of acquiring disease from highly infected patient.
    c. To monitor the health status of the new staff who's providing care to the patients.
2. **Scope**
    a. **First Step**
        i. All staff should submit for health assessment and vaccination in Employees Health Clinic.
    b. **Last Step**
        i. All staff is free from contagious diseases.
3. **Definition**
    a. Employee surveillance in the neonatal unit - The act and state of being constantly attentive and responsible to prevent infection and to provide effective and efficient care to the neonates.
4. **Abbreviation:**
    a. EHC-Employee Health Clinic
5. **Policy Statements**
    a. All staffs must be free from respiratory, gastrointestinal or skin infection, active herpes simplex and herpes zoster.
    b. All staff must be free from infectious disease such as hepatitis.
    c. All staff must have immunization against hepatitis, meningitis, mumps, measles, and rubella and has known immunity to chickenpox.
    d. lf epidemic or outbreaks are confirmed all personnel staff must have culture swab of the following areas:
        i. Throat
        ii. Nasal
        iii. Hand
        iv. Axilla
    e. All staff must be aware that the following infectious disease of the infant can be transmitted to health care personnel:
        i. Rubella
        ii. Hepatitis B
        iii. Cytomegalovirus
    f. All staff must have theoretical and clinical knowledge about infectious disease and infection control practices.
    g. Any suspected or confirmed infectious disease must be reported to infection control officer.
    h. Pregnant staff must not work in the isolation unit.
6. **Procedure and Rationale:**
    a. Material/Equipment

i. Blood sample
ii. Blood containers
iii. Culture swabs
iv. Vaccine for immunization

Procedure	Rationale
1. Restrict personnel from patient care who has skin, respiratory, gastrointestinal infection.	To prevent cross infection to immune-compromised infants.
2. Submit all staff for serology clearance.	To obtain health clearance and assess if fit to work.
3. Coordinate with EHC for staff vaccination.	Vaccination is one way that helps prevent the spread of infection.
4. . Obtain multiple swabs from all personnel working in the unit.	Determines the presence of positive culture and confirms if epidemic or endemic.
5. Education to all staff of the diseases process. • Epidemiology • pathology • Clinical manifestation • Treatment • Prognosis • Prevention	This will guide the staff on how they can prevent and treat the infection.

7. **Responsibilities**
    a. Head Nurse - Ensures that all staff undergoes a regular medical checkup and vaccination in the EHC. She should keep an updated vaccination record of the staff in the unit.
    b. Charge Nurse - Maintains staffing ratio in the unit according to patient acuity.
    c. Staff Nurse - Submit her for a regular medical examination and avail vaccination in the EHC. She should be aware and directed that no roaming around the unit is maintained.

8. **Documentation**
    a. Employees Health Clinic Vaccination Logbook
9. **Measurements**
    a. 100% of the staff will comply with the infection control policy and EHC regulations.
